

2025 Preschool Quality Improvement Plan

Improvement Goal / Where do we want to get

To expand opportunities for children to exercise their agency, focusing on vocabulary development empowering them to express their ideas and make decisions in their social interactions and learning.

Area of Impact

Learner Agency

How might we achieve this

If we create inclusive environments that encourage conversation and challenge, through play, music, dance, drama, visual arts, and open-ended questions, we will empower children to expand their vocabulary and express themselves confidently.

What does success look like / How will we measure our success

Through our pedagogical documentation and collection of data, we will see evidence of:

- Children making choices to independently enter play.
- Children cooperating with others and working collaboratively.
- Children using oral language to solve social problems, demonstrating learner agency in their interactions.
